MEMORANDUM

TO: Pete Hassemer, IDFG

FROM: Michele DeHart

DATE: December 10, 2014

RE: NPCC Fish and Wildlife Program hatchery production reporting requirement

In response to your request the FPC staff reviewed the hatchery production reporting requirement contained in the NPCC Fish and Wildlife Program Appendix L, Council topic-specific tracking (page 108). Item 2 in this section requires annual reports on the number of juvenile fish released each year by Bonneville and the hatchery managers. This report required by the NPCC Program is easily generated each year by the Fish Passage Center. The FPC maintains a map-based database of releases from anadromous hatcheries in the basin; the releases are reported to the FPC annually by the entities managing the hatcheries. The FPC staff has developed the following examples of annual reporting of 2014 hatchery releases for your review. These are just a few examples of how the release information can be grouped and summarized. Each of the examples does report all of the information available (at the time the report was generated) for each report category, and thus may satisfy the Council’s reporting requirement. Other reporting options are available, such as reporting only specific hatchery sites, major population groups, etc. The FPC staff can work with the Council to specify the reporting format that best satisfies the Council’s needs.
In the following reports, the abbreviations used are as follows:

<table>
<thead>
<tr>
<th>Miscellaneous Terms</th>
