COE-NWD-CM-F (Fish Management Office)  
COE-Walla Walla District  
COE-Portland District  
BPA-PG-5 and BPA-PGPO  
BIA, Portland Area Office

FROM: Don Sampson, *Executive Director*

DATE: April 23<sup>rd</sup>, 2003

SUBJECT: **Operation of the Lower Columbia Pools for the Spring 2003 Treaty Fishery**

The Columbia River Inter-Tribal Fish Commission, on behalf of its member tribes the Nez Perce Tribe, the Yakama Nation, the Confederated Tribes of the Umatilla Reservation, and the Confederated Tribes of the Warm Springs Reservation, requests the following reservoir operations in Zone 6 (Bonneville to McNary dams) during the 2003 spring Treaty fishery. Implement the following hydro-system operations during the ceremonial, subsistence, and commercial Treaty fishery times as established by the tribes and the Columbia River Compact.

SPECIFICATIONS: Implement the following operations as a hard system constraint as follows:

**April 24<sup>th</sup>, 2003, 6 am, Thursday, through 6 pm, April 26<sup>th</sup>, 2003, Saturday.**

**Bonneville Pool: Operate the pool within 1.0 foot from full pool (msl elevation 77 – 76).**

**The Dalles (Celilo) Pool: Operate the pool within 1.0 foot (msl elevation 159.5 - 158.5).**

**John Day Pool: Operate the pool within 1.0 foot (msl elevation 264.5 - 263.5).**

**JUSTIFICATION:**

The 2003 spring Treaty fishing season is of critical importance to CRITFC's member tribes. The anticipated escapement of an estimated 193,000 adult spring Chinook will create harvest opportunities that tribal fishers have not realized in the last 25 years until recent years. Many fishers will be exercising their treaty rights by participating in this harvest. Many cultural and religious ceremonies and practices will occur with the harvest of these salmon.

During a meeting at CRITFC's Law Enforcement Division in Hood River on September 2, 1999, tribal fishers explained the impacts of unstable pools and pools below full to the Treaty fishery to Colonel Mogren and Lt. Colonel Harshbarger. The tribal fishers explained that a pool fluctuation of 1.0 foot or more disrupts tribal fishery operations. Specific problems include: (1) increased local currents that sweep debris into fishing nets, (2) rapid 1-2 hour drops in water level will lead to entanglement of nets, (3) boat access problems, and (4) nets torn from their anchors. Nets and gear are costly to replace. Any delays or disruptions to tribal fishing operations caused by the excessive pool fluctuations in Zone 6 negatively impacts tribal incomes, food resources and cultural practices.

The fishers also stressed to Corps officials that the loss of fishing opportunity during the extremely limited treaty fishery cannot be replaced. Much of the tribal fishers' income and food is generated during the brief treaty fishing season, thus, any delays or disruptions to their fishing operations caused by the excessive pool fluctuations in Zone 6 negatively impacts tribal incomes, food resources, and cultural practices.

Implementing this request will insure that the Federal operating agencies meet their federal trust responsibilities to the Columbia Basin treaty tribes. If this SOR cannot be accommodated, CRITFC's member tribes request a detailed written response from the federal operators, with justification, by Friday May 2<sup>nd</sup>, 2003.
