SYSTEM OPERATIONAL REQUEST: #2005-10

The following State, Federal, and Tribal Salmon Managers have participated in the preparation and support this SOR: U.S. Fish & Wildlife Service, Idaho Department of Fish and Game, Oregon Department of Fish and Wildlife, NOAA Fisheries, Nez Perce Tribe, Shoshone-Bannock Tribes, and the Columbia River Inter-Tribal Fish Commission.

TO:      B. G. Grisoli       COE-NWD
         James D. Barton       COE-Water Management
         Cindy Henriksen       COE-RCC
         Witt Anderson        COE-P
         Col. Richard Hobernicht  COE-Portland District
         LTC Randy L. Glaeser  COE-Walla Walla District
         J. William McDonald   USBR-Boise Regional Director
         Stephen J. Wright     BPA-Administrator
         Greg Delwiche         BPA-PG-5

FROM:    David A. Wills, Chairperson, Salmon Managers

DATE:    May 3, 2005

SUBJECT: Priest Rapids Flows to Improve Migration Conditions in the Middle Columbia River

SPECIFICATIONS:

- Increase flows at Grand Coulee Dam to provide 135 Kcfs at Priest Rapids Dam beginning May 4, 2005 and continue through the month of May. Do not draft Grand Coulee below elevation 1240 feet and assure refill to elevations 1280-1285 feet by late June.

JUSTIFICATION:

The Passage Index for combined yearling chinook at Rock Island Dam on May 2\textsuperscript{nd}, 2005 was 408; the combined steelhead passage index over the same day was 451. Based on historic passage information, both combined yearling chinook and steelhead numbers are expected to continue to increase over the next few weeks. The flow target of 135 Kcfs is the seasonal flow objective listed in the NMFS 2000 Biological Opinion, and in the 2004 Updated Proposed Action.
Historic and Realtime Passage Index at Rock Island Dam For Yearling Chincok

Historic daily proportions average of 1985-94. Curve scaled to projected 2005 index, using NOAA estimated population, and a 1% FGE.

Historic and Realtime Passage Index at Rock Island Dam For Steelhead

Historic daily proportions average of 1985-94. Curve scaled to projected 2005 index, using NOAA estimated population, and a 2% FGE.
